Project Title: Time Website

I want to build a multi-page site with typical navigation across the top. I might go wild with it though and put the navigation elsewhere like across the bottom. I think there is a lot of content I can draw from such as the history of time and additional concepts such as the speed of time relative to its distance from a blackhole. Images might be difficult to diversify, but I'm sure its doable.

- **Home Page/Intro** - Introduce basic point about the magnificence(? or a better adjective) of time and how it came to be defined the way it has.
-
- **Discovery** - Around when and by who time was "discovered"
-
- **Society** - social importance of the passage of time; societal awareness of time
-
- **Science** - how? Why? What? Sundials and blackholes!
-
- **Sources** - <https://en.wikipedia.org/wiki/Time>
